

Strategy Description

At Capital Management Investor Services, we utilize Exchange-Traded Funds, "ETF's", and their associated equity options to implement strategies which have been practiced for years within the institutional world but which are not readily available to the individual investor. Distancing ourselves from the tumultuous world of individual stocks, we attempt to bring diversification and risk offset to our clients by utilizing broad-based indices. The options strategies can be designed for each specific clients' individual needs; from the simple covered call to the more complex approach. With over seven years of trading history, CMIS is positioned to bring this offering to the broader financial world. Uncertainty drives investors to seek investments with known and lower risk; CMIS can deliver on this goal by utilizing hedging and careful strike management. Uncertainty also drives the intelligent investor to seek proactive ways to generate income; CMIS strives to deliver monthly income through the monthly option cycle. This income separates our strategy from most in the marketplace; while most investment strategies are passive and reactionary, CMIS seeks to generate income in times when most investors can do nothing but hold and wait.

Highlights

- Provides long term capital appreciation through realized short-term gains
- Experienced in working ETFs and their associated equity options
- Strong risk adjusted returns
- Utilizes hedging
- No market timing, disciplined approach focused on working sectors
- Flexibility to meet the needs of independent firms

2008	0.08	14.78	20.12	24.65

0% Increasing Risk → 25%
Based on standard deviation of quarterly returns from January 1st to December 31st in 2007 and 2008

Manager Overview

Investment Manager

Headquartered in Miami, Florida, Capital Management Investors Services, Inc., "CMIS", is a SEC Registered Investment Advisory Firm that offers specialized investment management services to a broad spectrum of institutional and private clients. CMIS is continuing to grow in offering sub-advisory services to other RIA and IA Firms. CMIS is focused on enhancing absolute market returns through the usage of Exchange-Traded Funds and their listed equity options. CMIS utilizes the newest products and most effective trading and analysis software. These tools and techniques, used together, provide for the highest probability of principal protection and portfolio performance. Accounts are tailored to the investor's level of risk aversion after discussion relative to expectations and risk tolerance. CMIS provides complete and total transparency of holdings, trading costs and professional service fees.

Founded in 2003
