

# Managed ETF 500 Index Fund

## Fund Information

The Managed ETF 500 Index Fund is a collective investment fund ("CIFs") maintained by TD AMERITRADE Trust Company ("Trustee") that invest in the strategies of Retirement Alliance Inc. ("RAI").

## CIF Objective

The Managed ETF 500 Index Fund is professionally managed in order to seek to provide investors with income, which is derived by investing in the SPDR S&P 500 Exchange-Traded Fund (Ticker Symbol: SPY) on a monthly basis. The SPDR's holdings are comprised of the 500 stocks in the S&P 500 Index. The main objective of the SPDR is to replicate the total return of the S&P 500 Index. The Fund's income and protection will be managed by utilizing either "Equity Collars" or "Credit Spreads." A "collar" is a protective options strategy that is implemented after a long position in a stock has experienced substantial gains. It is created by purchasing an out of the money put option while simultaneously writing an out of the money call option. Collars can be used to protect against massive losses, but they also prevent massive gains. A "credit spread" is an options strategy where a high premium option is sold and a low premium option is bought on the same underlying security.
